

Mathematics Problem of the fortnight #4

$$1 + 3 + 5 = 9$$

$$? + ? + ? = 111$$

An example of consecutive odd numbers is 1, 3, 5. Find three consecutive odd numbers with a sum of 111.

Post any solutions into either the postbox outside Mrs McCordick's room on LS site or the one at the notice board outside the staffroom on CC site by 3pm Tuesday 22nd January.

Remember to include your name and house with your solution.

** Answer revealed next week **

Last week's answer

The camel caravan had 61 camels.
