Upcoming Taster Days at CAFRE

Timed with UCAS 2023 and 2024 Applicants in mind, these Taster events will allow pupils to spend a day in the life of a CAFRE student, attending lectures and practicals, meeting lecturers and potential classmates and getting a feel for what degree level study at CAFRE could be like for them.

Food Course Taster Day
Wednesday 15th November 2023, 9.30am-2.45pm

Join us to sample a day in the life of a Loughry Campus Food student!
Sink your teeth into a lecture, whip up some food magic and mingle with our students.

Book Now!

- History, Anthropology, Philosophy and Politics
- Law
- Business (Accounting, Management etc.)
- Social Sciences, Education and Social Work

Students and parents/guardians will be able to attend subject talks and chat with current students and academics across the wide range of areas listed above.

Nuffield Research Placements

The NRP programme provides engaging, hands-on research projects, where Year 12 students have the opportunity to make a meaningful contribution towards the work of a host organisation through a well-supervised but independent research collaboration relating to an area of science, quantitative social science, computing, technology, engineering or maths (or a combination!).

Students can apply via the button below but please make sure you've checked your eligibility requirements

[Check eligibility requirements here](#)

Which placement?

Students can participate in Research Placements or Experiences. Both offer a rewarding experience for enthusiastic and curious young people.

Nuffield Research Placements

Nuffield Research Placements (NRPs) are 2-week collaborations with a STEM-related knowledge expert on a live research question or area of development. While producing a scientific or technical report and poster, this opportunity ensures that students contribute meaningfully to the host organisation's current work.

Nuffield Experience Placements

Nuffield Experience Placements (NEPs) are 5-day explorations with industry experts to identify essential skills needed for employment in STEM sectors. While producing a workbook and reflective report, students gain insight into working in professional environments as well as knowledge of the challenges for different sectors, in turn preparing them for employment.
