

Numeracy Puzzle #3

Find a number with its letters in alphabetical order.

Example: "five" has "fiv" in alphabetical order, but not "e".

Join Google classroom code **5KZTCWZ** and post your answer in the assignment slot and then click hand in. Please submit all answers by Sat on Friday 10th March, with your house name too. Answers received after that will not be considered.

Extra house points if you consider other languages.

Remember to include your house.
