

# Numeracy Puzzle #3

Find a number with its letters in alphabetical order.

Example: "five" has "fiv" in alphabetical order, but not "e".

Join Google classroom code **txzncwz** and post your answer in the **assignment** set and then click hand in. Please submit all answers by 9am on Friday 15<sup>th</sup> March, with your house name too. Answers received after that will not be considered.

**Extra house points if you consider other languages.**

**Remember to include your house.**
